

# AIR CARE & SURFACE CARE DATE CODE EXPLANATION

To find the date for an RCP Air Care or Surface Care product look for the following series of alphanumeric characters printed on the product: "XX0460YYY".

The date that the product was produced is represented by the 4 numbers between the 2 letter strings. Depending on the product, there may be other characters in front or behind this string (these are internal codes that are not relevant for determining the product date code).

The first three digits in the date code are the Julian Date that the product was produced. Please use the Julian calendars below to find the corresponding Julian date for the product for either a regular, or leap year.

The fourth digit in the date code indicates the year that the product was produced: "0" =2020, "1" = 2021, "2" = 2022, etc.

#### **Example Dates:**

- XX0460YYY February 15<sup>th</sup>, 2020
- XX0011YYY January 1<sup>st</sup>, 2021
- XX3050YYY October 31<sup>st</sup>, 2020
